

CLOS ST. DENIS

Winery Profile

Clos Saint-Denis operates both an apple orchard and a vineyard at Saint Denis, Quebec, by the Richelieu river. The area is characterized by the rich clay soil, a careful selection of varieties of apples and a wide range of temperature varying from hot summer spells of well into the 80's to the below zero temperatures in winter. These attributes all combine to explain the uniqueness of Pomme de Glacé. Clos Saint-Denis has perfected the technique of making Apple Ice Wine. The result, Pomme de Glacé, is astounding and outstanding. Critics agree, this apple ice wine rivals other ice wines for it's lush texture and rich, concentrated flavors.

POMME de GLACÉ APPLE ICE WINE

Clos Saint-Denis Vineyards have successfully adapted ice wine techniques to carefully selected varieties of apples. *Pomme de Glacé* miraculously transforms the ordinary apple. This rich nectar's amber gold color, its pleasant aromas of honey, apricot, pineapple, and spice and its occasional hints of exotic tropical flavors are but part of its attraction. One can hardly believe that *Pomme de Glacé's* delicate balance of sweetness and acidity comes from the juice of common apples. Excellent chilled and sipped on it's own, rich golden *Pomme de Glacé* is even better with foie gras, aged cheddar cheese and a multitude of desserts.
